

Alchemilla (Lady's Mantle)

30ct Plug

Container:

Trade 1 Gallon Container

Finish:

6-8 weeks

When To Plant:

Early spring to early summer

72ct Plug

Container:

Trade 1 Gallon Container

Finish:

9-11 weeks

When To Plant:

Late winter to early summer

Growing Temperature:

55-65° F

Soil pH:

5.8-6.5

Fertility:

After new leaves emerge use a water-soluble fertilizer, solutions of 50-100 ppm at each watering.

For Controlled Release or Slow Release Fertilizer, see your preferred supplier for recommended rates for incorporation or top dressing, as it varies by fertilizer.

Moisture:

For potting soil use commercial planting media.

During active growth keep the soil consistently moist.

Allow plants to dry thoroughly between waterings, increase watering as the foliage emerges.

Holding Temperature:

40-50° F

EC Level:

2.0-3.0 pour through method

Vernalization:

Provide 6-9 weeks of temperatures below 40° F.

Pests and Diseases:

There are normally no major problems, especially in northern areas. In climates with hot nights, fungal problems may result when rain or irrigation water collects in the depression of the leaves and tight crowns. A fungicide program may be necessary in these areas.

Planting Level:

Plant plug at or slightly below soil level.

Lighting:

Day Neutral

Grower Tips:

Provide light shade during warm summer months.
