

Anemone

20ct Plug

Container:

Trade 1 Gallon Container

Finish:

6-8 weeks

When To Plant:

Late winter to spring

72ct Plug

Container:

Trade 1 Gallon Container

Finish:

10-12 weeks

When To Plant:

Late winter to spring

Growing Temperature:

60-65° F

Soil pH:

5.8-6.4

Fertility:

Feed 75-125 ppm N at each irrigation. Flush the growing medium with clear water every third or fourth irrigation.

Potting and Timing:

Plants should be adequately spaced to be able to develop properly.

Moisture:

Anemone prefer to have consistent moisture. Avoid allowing plants to dry out.

PGRs/Pinching:

PGRs are not necessary if plants are grown under proper conditions.

Holding Temperature:

50-60° F

EC Level:

1.5-2.5 pour through method

Vernalization:

Cold beneficial 11-15 weeks below 40° F.

Pests and Diseases:

Rhizoctonia, Pythium, fungus gnats and foliar nematodes. Leaves are sensitive to pesticide sprays. Anemone roots are naturally brownish-yellow and consequently may appear diseased when they are not.

Planting Level:

Crown level even with soil line.

Lighting:

Long days required for flowers.
