Aruncus (Goat's Beard)

**20ct Plug**
- Container: Premium 1 Gallon Pot
- Finish: 7-9 weeks
- When To Plant: Late winter to spring

**30ct Plug**
- Container: Trade 1 Gallon Container
- Finish: 7-9 weeks
- When To Plant: Late winter to spring

**72ct Plug**
- Container: Trade 1 Gallon Container
- Finish: 10-12 weeks
- When To Plant: Late winter to spring

**Growing Temperature:**
- 60-65° F day
- 55° F nights

**EC Level:**
- 1.5-2.0 pour through method

**Vernalization:**
- Provide 8-10 weeks of cold below 40° F for flowers.

**Pests and Diseases:**
- Leaf spot (Ramularia or Cercospora), stem canker (Leptosphaeria).

**Moisture:**
- After plants are established keep consistently moist. If plants dry out, their foliage turns irreversibly brown and crispy, thereby rendering them unsaleable.
- Water well after planting and increase watering as the foliage emerges.

**Holding Temperature:**
- 45-55° F

**Soil pH:**
- 5.5-6.5

**Fertility:**
- After new leaves emerge use a water-soluble fertilizer, solutions of 50-100 ppm at each or every other watering.

**Potting and Timing:**
- Begin growing plants cool at 55-60° F for the first couple of weeks. Increase temperature to speed flowering or lower temperature to delay flowering.

**Planting Level:**
- Place crown at or slightly below soil line.

**PGRs/Pinching:**
- Sumagic (Uniconazole) 5 ppm spray 3-4 weeks after transplanting. Multiple applications may be needed at 7-10 day intervals.
