

# Asparagus

## Grade #1 Bare Root

### Finish:

2 seasons in ground before plants yield a good crop.

### When To Plant:

Early to mid spring

### Notes:

Asparagus require a planting depth of 6". We recommend a very deep container or to plant directly in ground.

### Growing Temperature:

50-55° F

### Fertility:

In early spring, when mulch is removed, 10-10-10 can be applied and scatched into the top two inches of soil.

### Moisture:

Moderate moisture with good drainage.

### Lighting:

Full sun

### Soil pH:

6.0-6.5

### Potting and Timing:

Bare root Asparagus is best planted directly into the ground in trenches with the crown 6 inches deep.

### Planting Level:

Crown 6 inches below soil line.

### Grower Tips:

Asparagus may take a couple seasons before a yield can be expected.
