30ct LF Plug

Container:
Trade 1 Gallon Container
Finish:
10-12 weeks
When To Plant:
Late spring to fall

Growing Temperature:

55-60° F

Soil pH:

5.8-6.2

Fertility:

Feed moderately at 75-125 ppm N at each watering while plants are activly growing. Feed rates should be lower during warm temperatures since growth rate slows.

For Controlled Release or Slow Release Fertilizer, see your preferred supplier for recommended rates for incorporation or top dressing, as it varies by fertilizer.

Moisture:

Moderate to moist while actively growing in spring and fall. Moderate to slightly dry during summer when growth slows.

Lighting:

Provide 30% - 50% shade in summer.

Holding Temperature:

40-50° F

EC Level:

1.5-2.5 pour through method

Vernalization:

Provide 8-10 weeks of temperature below 45° for best flower performance.

Pests and Diseases:

The most common issues with Epimedium are viruses and root nematode. Avoid trimming to prevent the spread of viruses.

Potting and Timing:

Best planted in summer of the season prior to sales. Plants will do most of their bulking under cool temperatures in fall and spring.

Planting Level:

Crown should be planted slightly below soil line.

PGRs/Pinching:

Since Epimedium are evergreen, avoid trimming plants. Only remove dead foliage.
