Ligularia

20ct Plug

Container:
Premium 1 Gallon Pot
Finish:
8-10 weeks
When To Plant:
Late winter to spring

72ct Plug

Container:
Premium 1 Gallon Pot
Finish:
12-14 weeks
When To Plant:
Early to mid summer for full flowering plants the following spring.
Spring for smaller container (non flowering)

Growing Temperature:

Rooting out: 60-68° F

Growing: 68-72° F

EC Level:

1.5-2.5 pour through method

Vernalization:

8-12 weeks of cold is required for flowers.

Potting and Timing:

Bulking up the year before planned sales is highly recommended, especially when growing in larger containers.

Planting Level:

Crown even with soil line.

Lighting:

Ligularia requires long days to flower. Provide moderate shade to prevent foliage burn and stress.

Holding Temperature:

40-50° F outdoors

Soil pH:

5.8-6.2

Fertility:

Feed 100-125 ppm N at each watering.

Pests and Diseases:

No major pests or diseases, but watch for leaf scorch (due to sun, dark-leaved forms) and wilt (due lack of water in direct sun).

Moisture:

Moderate to moist.

PGRs/Pinching:

Proper spacing and growing conditions are the best option to control overall size.

Grower Tips:

Plant in early summer for full flowering plants the following spring.
