Primula (Primrose)

72ct Plug

Container:
Trade 1 Gallon Container
Finish:
10-12 weeks
When To Plant:
Late summer - fall

Growing Temperature:
65-70° F

Soil pH:
5.8-6.2

Fertility:
Feed moderately at 100-150 ppm N at each watering.

Pests and Diseases:
Watch for mites, thrip, and aphids.

Moisture:
Consistant moisture.

Planting Level:
Top of plug level with soil line.

Lighting:
Provide high light levels.

Holding Temperature:
40-50° F

EC Level:
2.0-3.0

Vernalization:
Provide 8-10 weeks of temperatures below 45 degrees F for best flower performance.

Potting and Timing:
Plant in late summer to fall under warm temperatures. Grow indoors so as not to introduce cold nights until finished. Once bulked then plants should be vernalized.

Primula will flower under cool temperatures as spring approaches.

Grower Tips:
Keep plants warm until they reach desired size. Cool nights can cause premature flowering.
