

# Schizachyrium (Little Bluestem)

## 30ct LF Plug

Container:

Premium 1 Gallon Pot

Finish:

8-10 weeks

When To Plant:

Summer to late summer for next season

Notes:

Save finished 1 gallon plants to step up into 3-5 gallon containers in the fall. This will yield large plants for the following season.

## 72ct Plug

Container:

Trade 1 Gallon Container

Finish:

10-12 weeks

When To Plant:

Summer to late summer for next season

Notes:

Save finished 1 gallon plants to step up into 3-5 gallon containers in the fall. This will yield large plants for the following season.

## Growing Temperature:

68-75° F

## EC Level:

1.50-2.0

## Vernalization:

Provide 10-12 weeks of cold temperatures below 45° F.

## Potting and Timing:

Plant during warm summer temperatures for best bulking results. Avoid spring planting as they will not perform the best.

## Planting Level:

Crown at soil line.

## Soil pH:

5.8-6.5

## Fertility:

Avoid overfeeding Schizachyrium as it causes floppy growth. They are native grasses that do not require a large amount of fertility. Feed lightly at 50-75 ppm as needed.

## Pests and Diseases:

Avoid wet conditions as this will cause root and crown rot.

## Moisture:

Slightly moist

## Lighting:

Provide high light levels. Direct sun will promote the best foliage color and habit.
