Sedum (Autumn Stonecrop)

**72ct Plug**
- Container: Premium 1 Gallon Pot
- Finish: 10-12 weeks
- When To Plant: Summer to late summer
- Notes: Bulk in summer for a full plant the following spring.

**Grade #1 Bare Root**
- Container: Premium 1 Gallon Pot
- Finish: 8-10 weeks
- When To Plant: Spring to late spring

**Growing Temperature:**
- 70-75° F days
- 55-65° F nights

**Fertility:**
- Needs 100-200ppm fertilizer for optimal growth.

**Pests and Diseases:**
- Preventive fungicides recommended at transplant time. Mildew can be problematic, treat as needed.

**Moisture:**
- For potting soil use Professional planting media.
- Avoid overwatering; extended periods of wet soil will be detrimental.

**PGRs/Pinching:**
- One soft pinch, 1 week after planting. Second pinch optional. Florel® at 500ppm is also effective at increasing branching. B-9 / Cycocel tank mix will control growth; however, growing plants dry will also control growth. Larger plants with better branching and form will occur with vernalization.

**Soil pH:**
- 5.8-6.5

**EC Level:**
- 2.0-3.5 pour through method

**Vernalization:**
- Not required.

**Potting and Timing:**
- Some trimming may be necessary at planting time to fit into the container.
- Warm and slightly dry conditions after transplanting speeds root in and growth.

**Planting Level:**
- Place crown just at or below soil level.

**Lighting:**
- Requires high light in production; in a very high light environment, such as Southern California, plants may need up to 30% shade to protect against sun scorch.
- Sedum require long days to flower. Once buds form plants can be moved to a short day environment.
