# Sempervivum (Hen & Chicks)

**Grade #1 Bare Root**

Container:
Trade 1 Gallon Container
Finish:
6-8 weeks
When To Plant:
Late winter to spring

**Grade #2 Bare Root**

Container:
1 Quart (12 count)
Finish:
8-10 weeks
When To Plant:
Late winter to spring

**Growing Temperature:**
65-70° F

**Soil pH:**
5.8-6.5

**Fertility:**
Moderate feed at 75-100 ppm N at each watering.

For Controlled Release or Slow Release Fertilizer, see your preferred supplier for recommended rates for incorporation or top dressing, as it varies by fertilizer.

**Moisture:**
Moist to slightly dry.

**PGRs/Pinching:**
Not needed for control of height. Configure may be used at spray rates of 200-400 ppm to increase the number of offshoots.

Growth regulator rates are suggestions but may vary due to time of year, region and water quality. Trialing is always recommended before applying to an entire crop.

**Holding Temperature:**
50-60° F

**EC Level:**
1.5-2.5 pour through method

**Vernalization:**
Not required but cool temperatures bring out the best foliage color.

**Pests and Diseases:**
Avoid wet conditions as it will cause root and crown rot.

**Potting and Timing:**
Late winter to spring

**Planting Level:**
Plant on top of soil line.

**Lighting:**
Grow under high light levels.

**Grower Tips:**
It is recommended to plant sempervivum in shallow containers such as a mum pan.
