

Sisyrinchium (Blue-Eyed Grass)

72ct Plug

Container:

Trade 1 Gallon Container

Finish:

12-14 weeks

When To Plant:

Late summer or late winter to spring

Grade #1 Bare Root

Container:

Trade 1 Gallon Container

Finish:

6-8 weeks

When To Plant:

Late winter to spring

Growing Temperature:

62-68° F

Soil pH:

5.8-6.2

Fertility:

Feed moderately with 75 - 125 ppm N at each watering.

For Controlled Release or Slow Release Fertilizer, see your preferred supplier for recommended rates for incorporation or top dressing, as it varies by fertilizer.

Moisture:

Moderate moisture is best. Water thoroughly and then allow plants to dry slightly. Avoid wet conditions.

Planting Level:

Crown at soil line or top of plug level with soil line.

Holding Temperature:

50-60° F

EC Level:

1.5-2.5 pour through method

Vernalization:

Provide 8 - 10 weeks of cold for best flowering performance.

Pests and Diseases:

Aphids, thrip, and spider mites are most common. Root and crown rot can be problematic under wet growing conditions or if planted too deep.

Potting and Timing:

Plant plugs in late summer for proper bulking time. Bare root is the best option for spring.

If small plugs are purchased in spring, plant them in a 1 quart container rather than a 1 gallon.

Lighting:

Long days required for flowering. High light levels are best.
