

### **30ct Plug**

Container:

Premium 1 Gallon Pot

Finish:

7-9 weeks

When To Plant:

Summer to late summer or  
spring

#### **Growing Temperature:**

Rooting out: 65-72° F,

#### **Soil pH:**

5.8-6.3

#### **Fertility:**

Apply 100-150 ppm constant liquid feed.

For Controlled Release or Slow Release Fertilizer, see your preferred supplier for recommended rates for incorporation or top dressing, as it varies by fertilizer.

#### **Potting and Timing:**

Plants should be planted under warm temperatures and long days for good root establishment.

#### **Planting Level:**

Plant top of plug even with the soil line.

#### **Lighting:**

Provide high light levels for best growth.

#### **Holding Temperature:**

50-60° F outdoors

#### **EC Level:**

1.0-1.5 pour through method

#### **Vernalization:**

8-12 weeks of cold is required for flowers.

#### **Pests and Diseases:**

No major pests or diseases. Scout for aphids and spider mites.

Leaf spotting due to fungal pathogens can affect the foliage.

#### **Moisture:**

Grow in a well-drained commercial media.

Moderate to moist, allow to dry between waterings.

#### **PGRs/Pinching:**

Daminozide (B-Nine/Dazide) at 2500-5000 ppm can help to control growth. If growing in a greenhouse, plants can be trimmed during production to increase fullness and decrease height, but no more than 1/2 of the height should be trimmed off.

Growth regulator rates are suggestions but may vary due to time of year, region and water quality. Trialing is always recommended before applying to an entire crop.

#### **Grower Tips:**

Warm season grasses such as Sorghastrum are best grown in summer of the year prior to sales for best results.
