

# Stokesia (Stokes' Aster)

## 30ct Plug

Container:

Trade 1 Gallon Container

Finish:

7-9 weeks

When To Plant:

Late winter to spring

## 72ct Plug

Container:

Trade 1 Gallon Container

Finish:

10-12 weeks

When To Plant:

Late summer to early fall or  
late winter to spring

Notes:

If planting late summer to  
early fall, bulk and overwinter  
for following spring sales.

## Growing Temperature:

60-70° F days / 55-60° F nights

## Soil pH:

5.5-6.2

## Fertility:

Feed 125 - 150 ppm N at each watering.

For Controlled Release or Slow Release Fertilizer,  
see your preferred supplier for recommended rates  
for incorporation or top dressing, as it varies by  
fertilizer.

## Potting and Timing:

Use well-drained media to keep plants from  
remaining too wet. Small plugs can be planted late  
summer to bulk prior to vernalization.

## Planting Level:

Top of plug should be level with the soil line.

## Lighting:

Stokesia flower quicker under long day conditions.  
High light levels are best.

## Holding Temperature:

50-60° F

## EC Level:

1-1.25 pour through method

## Vernalization:

Not all varieties require vernalization, but will lower  
well under a wider range of light intensities and  
photoperiods following a cold treatment. It is  
recommended to provide at least 10 weeks of  
temperatures below 45° F.

## Pests and Diseases:

Generally pest free. Avoid overwatering as it may  
lead to crown or root rot.

## Moisture:

Keep soil evenly moist, avoiding excessively dry or  
wet media.

## PGRs/Pinching:

Often not required, but if needed sprays of 2000  
ppm Daminozide/1000 ppm Cycocel or Daminozide  
alone at 5000 ppm are effective.

Growth regulator rates are suggestions but may  
vary due to time of year, region and water quality.  
Trialing is always recommended before applying to  
an entire crop.
