

# Yucca (Adam's Needle)

## Grade #1 Bare Root

### Container:

Premium 1 Gallon Pot

### Finish:

6-8 weeks

### When To Plant:

Early to late spring

### Growing Temperature:

65-75° F

### Soil pH:

5.8-6.2

### Fertility:

Feed moderately at 75 - 100 ppm N at each watering.

### Potting and Timing:

Plant bare root plants in early to late spring. Plants are evergreen so they will arrive with foliage on them.

### Planting Level:

Plant with the crown at soil line. Tubers should not be exposed.

### Holding Temperature:

50-60° F

### EC Level:

1.5-2.5

### Pests and Diseases:

Thrip, scale, mealybugs, and weevils.

Coniothyrium or brown leaf spot (*Coniothyrium concentricum*), Cytosporina or gray leaf spot (*Cytosporina* sp.), Fusarium stem rot - (*Fusarium* spp.)

### Moisture:

Moderate moisture is best. Avoid overwatering.

### Lighting:

Yucca prefer high light levels for best growth.

### Grower Tips:

Bare root plants are large. Use a true 1 gallon container instead of a trade 1 gallon.

Some growers prefer using a 2 gallon container to allow plenty of room for the large, tuberous roots.
